PROFESSIONAL SUMMARY

Computer Science and Engineering student pursuing Bachelor of Technology with skills in AWS, Docker, FastAPI, Machine Learning and 2 internship experiences.

TECHNICAL SKILLS

Languages:	Python, TypeScript, JavaScript
Frameworks:	FastAPI, React
Databases:	PostgreSQL, MongoDB, Redis
ML/AI:	Machine Learning, Natural Language Processing
Tools & Cloud:	AWS, Docker, Git, Linux

EDUCATION

Bachelor of Technology in Computer Science and Engineering	Institute of Advanced Computing and Applied Engineering Bengaluru, India
• 2023-2027 CGPA: 8.84/10	

EXPERIENCE

Software Engineering Intern	Nexora Recruitment Systems Bengaluru, India May 2026 - Aug 2026
• Implemented REST API endpoints for recruiting workflows.	
• Improved SQL query handling for candidate search and wrote unit-test coverage for profile validation.	
• Technologies: Python, FastAPI, PostgreSQL, Docker	
Research Engineering Intern	Applied AI Research Lab Remote May 2025 - Jul 2025
• Prepared structured datasets for a supervised learning prototype and documented reproducible data-processing steps.	
• Technologies: Python, Machine Learning	

PROJECTS

Campus Placement Intelligence Platform	Aug 2025 - Dec 2025
• Role: Backend and Data Developer	
• Built a FastAPI service that scores validated student profiles against job descriptions. Designed a React dashboard for placement-cell review and added evidence-backed recommendations.	
• Long project evidence sentence with validated implementation detail. Long project evidence sentence with validated implementation detail.	
• Long project evidence sentence with validated implementation detail. Long project evidence sentence with validated implementation detail.	
• Technologies: Python, FastAPI, PostgreSQL, React, Docker, AWS, Git	
• Produced explainable candidate readiness reports for synthetic campus-placement test data.	
https://github.com/maya-iyer-test/placement-intelligence https://placement-intelligence.example	
Longitudinal Skills Evidence and Interview Preparation Workspace	Sep 2024 - Dec 2024
• Role: Full Stack Developer	
• Created a web application that organizes course tasks, sends reminder queues, and visualizes weekly workload from user-entered study plans. Implemented typed API contracts, accessible client-side forms, and persisted study plans with relational queries.	
• Long project evidence sentence with validated implementation detail. Long project evidence sentence with validated implementation detail.	
• Long project evidence sentence with validated implementation detail.	
• Technologies: TypeScript, React, Python, PostgreSQL, Docker	
• Improved the consistency of peer interview preparation records across a synthetic cohort of student contributors.

Accessible Study Planner	Jan 2025 - Apr 2025
• Role: Full Stack Developer	

- Created a web application that organizes course tasks, sends reminder queues, and visualizes weekly workload from user-entered study plans.
 - Technologies: JavaScript, React, Python
<https://github.com/maya-iyer-test/study-planner>
- Grounded Research Paper Discovery Assistant**

May 2024 - Aug 2024
- Role: Research Developer
 - Developed a retrieval prototype that converts structured research interests into ranked evidence snippets, records query provenance, and surfaces only source-backed summaries for review by student researchers.
 - Technologies: Python, Natural Language Processing, MongoDB, Git
 - Created reproducible relevance experiments with documented limitations and citation links.

CERTIFICATIONS

- AWS Academy Cloud Foundations**

AWS Academy | Mar 2025
- Credential ID: TEST-AWS-2025-0310
<https://www.credly.com/test/maya-iyer>
- Relational Database Design and SQL Performance Fundamentals**

Open Learning Institute | Jun 2025
- Credential ID: TEST-SQL-2025-0618
<https://credentials.example/test/maya-iyer/sql-performance>
- Practical API Design with Typed Python Services**

Backend Engineering Academy | Jan 2026
- Credential ID: TEST-API-2026-0109
<https://credentials.example/test/maya-iyer/python-api-design>

ACHIEVEMENTS

- Department Merit Scholarship**

Institute of Advanced Computing | Aug 2025
- Awarded for academic performance in the Computer Science and Engineering cohort.
- Smart Campus Hackathon**

Innovation Cell | Finalist
- Project: Placement Intelligence Platform

RESEARCH & PUBLICATIONS

- Evidence-Grounded Candidate Ranking for Campus Placement**

Student Computing Research Symposium | 2026
- Maya Iyer, Test Research Mentor
 - DOI: 10.0000/test.aira.2026
<https://research.example/maya-iyer-ranking>

LEADERSHIP & ACTIVITIES

- Open Source Student Community**

Technical Lead
- Coordinated peer code-review sessions and backend-development workshops.
